

About Kepro

Founded in 1985 by physicians, Kepro provides technology-enabled services for priority populations to help them remain in the home or community of their choice. Kepro partners with government and private healthcare payers to maximize healthcare quality, improve accuracy, and increase efficiency.

Kepro's core solution lines ensure that clients' beneficiaries receive the right care delivered in the right place at the right time. Kepro's workforce numbers over 1,700 employees, including 600 full-time clinicians, across 17 U.S.-based offices, as well as a network of 4,500 physicians and 450 clinicians who serve on their advisory and review panels.

Kepro HCQU Goals

The Kepro Health Care Quality Unit (Kepro HCQU) is contracted to support the efforts of the Pennsylvania Office of Developmental Programs (ODP), Administrative Entities, and provider agencies within the intellectual disability/autism (ID/A) service delivery system, family caregivers, and individuals with ID/A, to continuously improve the quality of life experienced by individuals throughout southwestern PA - Allegheny, Bedford, Cambria, Fayette, Greene, Somerset, Washington, and Westmoreland Counties.

Our goal is to enhance the health and wellness of people with ID/A through the sharing of information with individuals, agency and family caregivers, and community health professionals, thereby supporting the opportunity for individuals with ID/A to live everyday lives.

To achieve this goal, we offer physical and behavioral health-related information that reflects current and accepted standards of care, evidence-based practices, and effective care strategies attuned to the specific needs of people with ID/A. This information is delivered in the form of training, technical assistance, capacity building activities, and general dissemination of informational materials and resources. In addition, information is offered in response to considerations generated through the Health Risk Screening Tool (HRST) process.

Kepro HCQU Activities

- Provide training on physical and behavioral health topics and technical assistance to caregivers who support individuals with ID/A.
- Provide clinical health care expertise to caregiver teams supporting individuals with complex physical and behavioral health care concerns. (Kepro HCQU does not provide direct consultation, diagnose, or manage crisis situations.)
- Build capacity within community organizations and the ID/A service system to improve access to community healthcare services, resources, and quality supports for people with ID/A.
- Disseminate information that promotes health and wellness for people with ID/A to caregivers, healthcare professionals, and the community.
- Identify and assess health-related information as it relates to aggregate health data collection. (Kepro HCQU does not conduct licensing or regulatory activities.)
- Collect and analyze data to assist ODP to identify health-related areas of concerns and focus Kepro HCQU activities on opportunities for improving quality of care for individuals with ID/A.
- Support ODP efforts to improve the quality of health care delivery systems and outcomes.
